## HTML, CSS, and JavaScript | Responsive Design | Front-End Frameworks

I am a highly driven and enthusiastic individual with a strong interest in moving from Civil Engineering and actively seeking an internship or entry-level position in the IT/Engineering sector. My current pursuits involve self-study primarily in front-end development, driven by a commitment to acquiring knowledge and fostering professional growth. I also possess interest in Test Engineering although haven't yet had a chance to enhance my knowledge in this direction. I am dedicated to learning, contributing my skills to real-world projects and advancing within the industry.

## PERSONAL PROJECTS

---

- **Personal web-site** (<https://leonidmezhonov.github.io>)
  - Simple but classy personal page created with HTML, CSS and a little JS. It's fully responsive so you can open it on your desktop, mobile or tablet.
- **Social network prototype** (<https://github.com/LeonidMezhonov/ReactSocialNetwork>)
  - For this project I used React, Redux, REST API (axios), Formik and also some React hooks. In this single page application, you can view profile, add posts to your feed, change your status, subscribe to friends and send them messages. This project is in progress but most of the features are already done.
- **Counter app** (<https://github.com/LeonidMezhonov/CounterApp>)
  - Minimalistic counter app that helps you to make counts e. g. for your sport exercises, number of guests at the concert or in the dance club. I'm working on front-end part using React and React hooks for this project along with my friend who is working on a back-end part. We are planning on adding themes, count history, data export and more interesting and useful features.

## WORK EXPERIENCE

---

**Bak Development (BAKPA INVEST s.r.o.)** – Prague, CZ

8/2021 – present

### Quantity Surveyor

Budget and offer preparation, price and material calculations.

- Established a budget control system utilizing an estimating program, resulting in enhanced operational efficiency and improved interactions with financial institutions (banks).
- Estimating and assessing costs for construction projects
- Selecting suppliers and subcontractors, and managing procurement processes
- Providing regular financial updates, including cost forecasts, budget deviations, and other relevant financial information

**Pareco s.r.o.** - Prague, CZ

7/2018 – 8/2021

### **Quantity Surveyor**

Preparation of tender proposals, price and material calculations.

- Estimating and assessing costs for construction projects
- Identifying opportunities for cost savings without compromising quality
- Selecting suppliers and subcontractors, and managing procurement processes to ensure the best value for the project

## **EDUCATION**

---

### **Hexlet**
